MMR Fiber Solutions and Prysmian Announce Strategic Partnership

FOR IMMEDIATE RELEASE
November 2, 2026

Phoenix, Arizona — MMR Fiber Solutions and Prysmian today announced a strategic partnership to support the development of critical fiber infrastructure across the Desert Southwest, strengthening the region's ability to meet rapidly growing demands for connectivity, digital transformation, artificial intelligence, and data center expansion.

The partnership brings together MMR Fiber Solutions, developer of the region's first new high-capacity fiber route in decades, and Prysmian, the world's largest wire and cable solutions provider and a global leader in the energy transition and digital transformation. Together, the companies will deliver the infrastructure necessary to support long-term economic growth and the increasing bandwidth demands of businesses, communities, carriers, and hyperscale data centers.

MMR Fiber Solutions' new network represents more than an infrastructure project—it is a strategic investment in the future of the Southwest connecting Arizona, New Mexico and the Texas Panhandle. By creating a new high-capacity corridor through one of the nation's fastest-growing technology and data center markets, the project will improve connectivity, enhance network reliability, and provide much-needed route diversity for the region.

"Prysmian is recognized worldwide for its innovation, quality, and leadership in fiber optic and cable solutions," **said Loralee Hunt, General Manager of MMR Fiber Solutions.** "As we advance the development of the Southwest's first new high-capacity fiber route in decades, investing with Prysmian ensures we are building a network with the highest standards of performance, reliability, and long-term scalability."

As the world's largest wire and cable solutions provider, Prysmian serves customers in more than 50 countries and plays a critical role in enabling both the global energy transition and digital transformation. The company's advanced telecommunications products support some of the world's most demanding network environments.

"We are excited to partner with MMR Fiber Solutions on this transformative initiative," **said Brian Dilascia, Sr. Vice President, Digital Solutions of Prysmian.** "The demand for connectivity continues to accelerate as AI, cloud services, and digital technologies reshape industries and communities. Together, we are helping create the resilient infrastructure foundation necessary to support that growth for decades to come."

The partnership comes at a pivotal time for the Desert Southwest, where unprecedented investment in data centers, advanced manufacturing, and technology development is creating an urgent need for additional fiber capacity and network resiliency. MMR Fiber Solutions' new route, supported by Prysmian's industry-leading cable solutions, is designed to help address these challenges while positioning the region for continued economic expansion.

By combining Prysmian's global manufacturing expertise with MMR Fiber Solutions' regional vision and infrastructure development capabilities, the companies are creating a foundation that will strengthen connectivity, improve reliability, and support future innovation throughout the Southwest.

###

About MMR Fiber Solutions
MMR Fiber Solutions, a subsidiary of MMR Group, is constructing the Desert Southwest's first new high-capacity fiber route connecting Mesa, Tucson, El Paso, Albuquerque and the Texas Panhandle in decades. Focused on enabling growth through strategic infrastructure investment, the company is building resilient, scalable fiber networks that support the evolving connectivity needs of carriers, enterprises, data centers, and communities throughout the region.

About MMR Group
Since 1991, MMR has been building more than projects – it's been building trust, relationships, and a reputation of excellence. MMR is the largest open-shop electrical and instrumentation contractor in the US with 30 offices across North America and +15,000 employees. MMR thrives on building complex projects throughout the world and is continuously recognized nationally as an industry leader.

About Prysmian
Prysmian is the world's largest wire and cable solutions provider and a global leader in energy transition and digital transformation. With operations in more than 50 countries, Prysmian designs, manufactures, and delivers innovative wire, cable, and connectivity solutions that power critical infrastructure around the world.
